

## Yearbook Cover Project

You will need to make a front and back cover for the school yearbook. Each needs to be A4 size. You will need to create an attractive, interesting design using all the skills you have learned so far.

Skills to use:

- ) Layer masks
- ) Adjustment layers
- ) Transform and warp
- ) Pen and text tools

The theme for this year's yearbook is movies, so your design should reflect this theme. Look at some movie posters for inspiration. What sort of techniques do they use? What makes them interesting and attractive?

### Things to do:

- ) Include the Jiaoke logo on the cover page. I will provide a copy of it on the webpage for you to use.
- ) Have a consistent theme that matches that of the yearbook'
- ) Pay attention to detail and make sure it is your best work.
- ) Double check your spelling and grammar.

### Things to avoid:

- ) Copying directly from other designs.
- ) Take a picture from a movie and slap a title on it.
- ) Ignoring the movie theme.
- ) Using the wrong image size.
- ) Focusing on the grad class only. The yearbook is for the whole school, not just grads.
