

1. Very simple portrait pose to start with. Have the model look over her shoulder. Note how unusual and interesting a portrait might look, if shot simply from a different angle.

2. In portrait photography, hands are usually not visible or at least not dominant. However, you might get creative by asking the model to play around with her hands trying different positions around her head or face. Keep in mind, though: No flat palms, and the hands should only show their sides!

3.

4. A really nice and lovely pose with a model sitting. The knees have to touch each other. Shoot slightly from above.
